

Property Management

www.ebaker.ca

Main Features

Track building permits and their inspections

Store Committee of Adjustment decisions, bylaw complaints, and zoning amendments

Track inspection scheduling, Development Applications, sewage system reinspections, Compliance Forms, water retention roll inspections, and Public Works inquiries

Track inspectors including when a reinspection is needed

Print Statistics Canada reports

Export permit data for MPAC

Export contractor and building permit data for mail merge letters in Microsoft Word

Building permits are an important part of a growing community, and with building permits come inspections. Our Property Management system provides an easy way to track both of these and more. It has exports and reports that allow you to keep MPAC and Statistics Canada up to date with minimal fuss. The Inspection Scheduler makes it easy to book inspections. The system also keeps track of reinspections for those times when there was a deficiency or simply for sewage systems that require regular reinspections. As well, you can create mail merge reports in Microsoft Word for outstanding permits or important contractors.
